

Check Sheet – X-Ray Fluorescence Analysers

Thanks for your recent order for the rental of XRF analysis equipment.

As previously advised, Ashtead Technology is committed to the safety of both its employees and customers. The equipment that you are considering renting produces ionising radiation and is therefore subject to some specific health, safety and legal requirements concerning its use, including the Ionising Radiation Regulations 2017 (IRR17).

Prior to us releasing the equipment to you, we require confirmation that you understand your obligations relating to the use of the equipment:

Please complete and return this form to us.

Obligation	Yes	No *
Do you understand your requirement for adhering to IRR17, including appointing a Radiological Protection Advisor (and supervisor if applicable) as well as having risk assessment and local rules documents for the equipment?		
Do you understand your requirement to notify the HSE prior to using the equipment?		
Please confirm that you are aware of the safety monitoring options available (e.g. Mini 900 dose rate meter / ring-badges etc.)		
Please confirm that you understand the requirement that all proposed users of the equipment should receive relevant documentation and training prior to use.		

** Please contact us if you require clarification with any of these obligations*

I confirm that I am aware of the obligations identified above.
